## Features

- Tableless CSS/XHTML valid architecture
- Three column flexible layout
- Color module suffix options: with a default blue color modules there's also another color option - grey.
- Sublevel menus in the left column: when certain sub menu is chosen its parent link will automatically be highlighted too.
- Fully collapsible module positions: you can easily publish or unpublish module positions (e.g. left, right, banner etc.) without breaking the layout
- For configuring the module positions please refer to the image below

If you have any enquiries please refer to our FAQ section or email us
